MIRAVALLLES VOLCANO

BOOK NOW

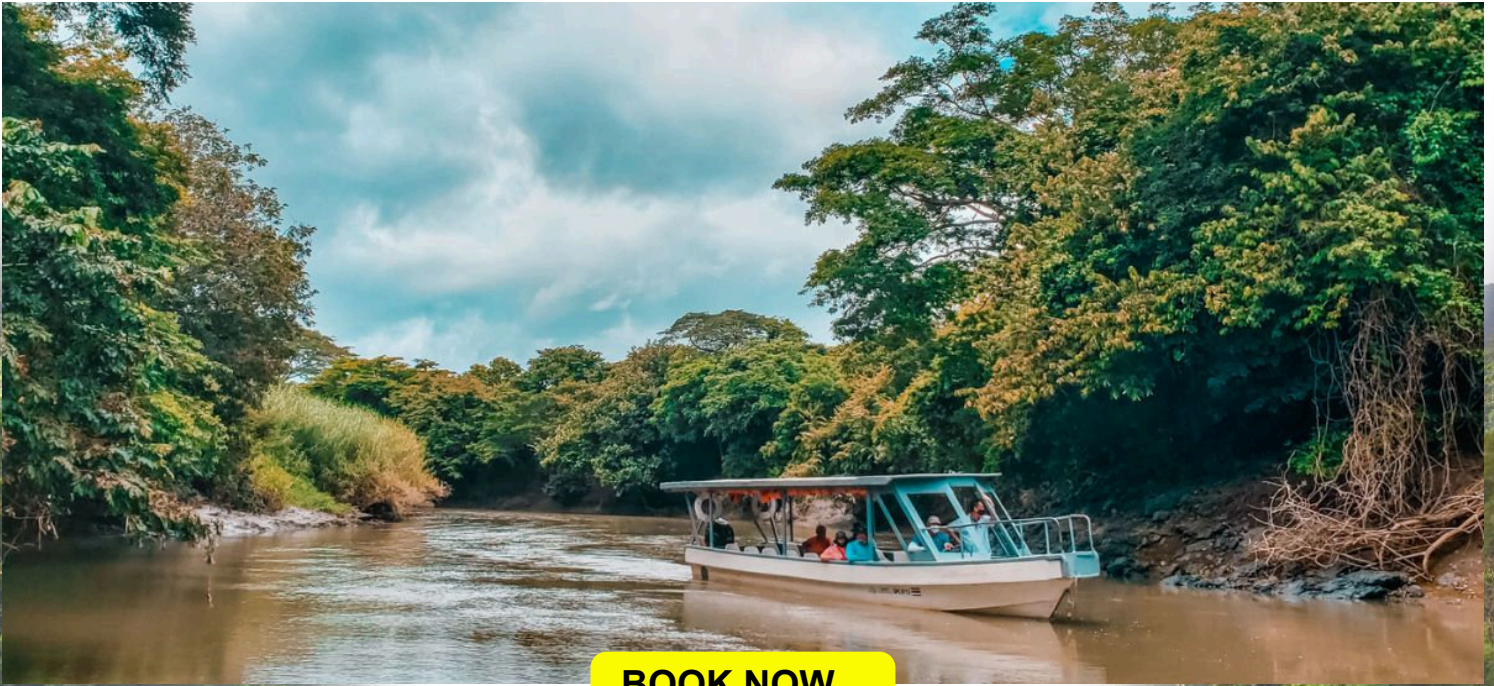

Embark on a scenic tour starting with a one-hour drive through the Guanacaste mountain range, offering majestic views of the Miravalles volcano. As one of Costa Rica's most active volcanoes, Miravalles stands at 6,653 feet and is known for gas emanations and geysers utilized in a government geothermal project for electricity production. The journey showcases rolling hills and passes by a geothermal plant near the volcano. Miravalles, a dormant volcano, holds protected status due to its tropical vegetation and geological features, including steam spewing fissures, sulfur springs, and bubbling mud pools. A geothermal energy plant at Las Hornillas, located in an underground reservoir, converts steam to electricity and is open for visits.

Upon reaching the facility, a short tractor or horseback ride leads to hanging bridges and an easy hike to a waterfall. Explore steaming fumaroles and crystal formations before relaxing in thermal pools with warm mud. After the rejuvenating experience, shower and change in provided dressing rooms before your return trip to your Beach Hotel.
